PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9939 (print)
ISSN 1088-6826 (online)

Available electronically at
www.ams.org/proc/

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Proceedings of the American Mathematical Society* is published monthly and is also accessible electronically from `www.ams.org/journals/`. Subscription prices for Volume 145 (2017) are as follows: for paper delivery, US$1603.00 list, US$1282.40 institutional member, US$1442.70 corporate member, US$961.80 individual member; for electronic delivery, US$1411.00 list, US$1128.80 institutional member, US$1269.90 corporate member, US$846.60 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US$6 for delivery within the United States; US$54 for delivery outside the United States. Subscription renewals are subject to late fees. See `www.ams.org/journal-faq` for more journal subscription information.

Back number information. For back issues see `www.ams.org/backvols`.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Permissions to reuse portions of AMS publication content are handled by Copyright Clearance Center's RightsLink® service. For more information, please visit `http://www.ams.org/rightslink`.

Translation rights and licensed reprint requests should be sent to `reprint-permission@ams.org`.

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

Proceedings of the American Mathematical Society (ISSN 0002-9939 (print); ISSN 1088-6826 (online)) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Proceedings, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

© 2017 by the American Mathematical Society. All rights reserved.

This journal is indexed in *Mathematical Reviews*, *Zentralblatt MATH*, *Science Citation Index*®, *Science Citation Index*™*–Expanded*, *ISI Alerting Services*℠, *CompuMath Citation Index*®, and *Current Contents*®*/Physical, Chemical & Earth Sciences*. This journal is archived in *Portico* and in *CLOCKSS*.

Printed in the United States of America.

♾ The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 145, No. 7 Whole No. 697 July 2017

A. ALGEBRA, NUMBER THEORY, AND COMBINATORICS

Pieter Belmans and Theo Raedschelders, Embeddings of algebras in derived categories of surfaces 2757
Geoffrey Janssens, Eric Jespers, and Doryan Temmerman, Free products in the unit group of the integral group ring of a finite group 2771
M. A. Batanin, An operadic proof of Baez-Dolan stabilization hypothesis 2785
Chi-Kwong Fok, Adams operations on classical compact Lie groups 2799
Paul Pollack, Bounds for the first several prime character nonresidues 2815
Florian Frick, Intersection patterns of finite sets and of convex sets 2827
David Ellis and Bhargav Narayanan, On symmetric 3-wise intersecting families 2843
Takashi Nakamura, Zeros of polynomials of derivatives of zeta functions 2849
Serge Skryabin, Finiteness of the number of coideal subalgebras 2859

B. ANALYSIS

T. Alazard, N. Burq, and C. Zuily, A stationary phase type estimate 2871
Xiongxiong Bao and Wenxian Shen, Criteria for the existence of principal eigenvalues of time periodic cooperative linear systems with nonlocal dispersal 2881
Stefan Steinerberger, Localization of quantum states and landscape functions . 2895
Filippo Dell'Oro, Enrico Laeng, and Vittorino Pata, A quantitative Riemann-Lebesgue lemma with application to equations with memory 2909
Turgay Bayraktar, Asymptotic normality of linear statistics of zeros of random polynomials 2917
Miguel Angel Navarro and Salvador Villegas, Sharp estimates of radial minimizers of p–Laplace equations 2931
Zhen-Hang Yang and Shen-Zhou Zheng, The monotonicity and convexity for the ratios of modified Bessel functions of the second kind and applications . 2943
Felipe Garcia-Ramos and Lei Jin, Mean proximality and mean Li-Yorke chaos 2959
QiQi Zhang, On the rigidity and boundary regularity for Bakry-Emery-Kohn harmonic functions in Bergman metric on the unit ball in C^n 2971
Ale Jan Homburg, Atomic disintegrations for partially hyperbolic diffeomorphisms 2981
Wojciech Bartoszek and Adam Śpiewak, A note on a Wiener-Wintner theorem for mean ergodic Markov amenable semigroups 2997
Marcela Caldarelli, Andrei K. Lerner, and Sheldy Ombrosi, On a counterexample related to weighted weak type estimates for singular integrals 3005
Javad Mashreghi, An inequality for Cauchy products 3013
Mara Trübner and Johanna F. Ziegel, Derivatives of isotropic positive definite functions on spheres 3017
Begoña Alarcón and Roland Rabanal, Hopf bifurcation at infinity and dissipative vector fields of the plane 3033
Alfonso Artigue, Pseudo-Anosov maps and continuum theory 3047
José F. Alves, Antonio Pumariño, and Enrique Vigil, Statistical stability for multidimensional piecewise expanding maps 3057

C. APPLIED MATHEMATICS

Thiago Dias, New equations for central configurations and generic finiteness 3069

Erkan Nane and Yinan Ni, Stability of the solution of stochastic differential equation driven by time-changed Lévy noise 3085

D. GEOMETRY

Wenlong Wang, Rigidity of entire self-shrinking solutions to Kähler-Ricci flow on the complex plane 3105
Yong Luo and Shun Maeta, Biharmonic hypersurfaces in a sphere 3109
Qi S. Zhang and Meng Zhu, Li-Yau gradient bound for collapsing manifolds under integral curvature condition 3117
John Lott, On tangent cones in Wasserstein space 3127
Yu Kitabeppu, A Bishop-type inequality on metric measure spaces with Ricci curvature bounded below 3137
Matthieu Fradelizi, Mathieu Meyer, and Vlad Yaskin, On the volume of sections of a convex body by cones 3153

F. STATISTICS AND PROBABILITY

Grzegorz Serafin, Exit times densities of the Bessel process 3165

G. TOPOLOGY

Funda Gültepe and Christopher J. Leininger, An arc graph distance formula for the flip graph 3179
G. A. Willis, The scale function and lattices 3185

Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of **length not exceeding 15 published pages**. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX.

Information on the backlog for this journal can be found on the AMS website starting from `http://www.ams.org/proc`.

In an effort to make articles available as quickly as possible, articles are electronically published on the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish is required before we can begin processing your paper. After a paper is accepted for publication, the Providence office will send a Consent to Publish to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. All articles submitted to this journal are peer reviewed. The AMS has a single blind peer-review process in which the reviewers know who the authors of the manuscript are, but the authors do not have access to the information on who the peer reviewers are. The AMS uses Centralized Manuscript Processing for initial submission. Authors should submit a PDF file using the Initial Manuscript Submission form found at `www.ams.org/submission/proc` or send one copy of the manuscript to the following address: Centralized Manuscript Processing, PROCEEDINGS OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Proceedings* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be at least one complete sentence and at most 150 words. Included with the footnotes to the paper should be the 2010 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from `www.ams.org/msc/`. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from `www.ams.org/msnhtml/serials.pdf`. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at `www.ams.org/mrlookup/`.

Electronically prepared manuscripts. Manuscripts should be electronically prepared in $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX style file and the \label and \ref commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web.

Authors may retrieve an author package for *Proceedings of the AMS* from `www.ams.org/proc/procauthorpac.html` or via FTP to `ftp.ams.org` (login as `anonymous`, enter your complete email address as password, and type `cd pub/author-info`). The *AMS Author*

Handbook and the *Instruction Manual* are available in PDF format from the author package link. The author package can also be obtained free of charge by sending email to `tech-support@ams.org` or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the Web at `www.ams.org/submit-book-journal/`, sent via email to `pub-submit@ams.org`, or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from `www.ams.org/authors/journals.html`. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a "hairline" for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

Any graphics created in color will be rendered in grayscale for the printed version unless color printing is authorized by the Managing Editor and the Publisher. In general, color graphics will appear in color in the online version.

AMS policy on making changes to articles after publication. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually published to the AMS website, changes cannot be made in place in the paper. The AMS does not keep author-related information such as affiliation, current address, and email address up to date after a paper is electronically published.

Corrections of critical errors may be made to the paper by submitting an errata article to the Editor. The errata article will be published electronically, will appear in a future print issue, and will link back and forth on the Web with the original article.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from `www.ams.org/mstrack/`. An explanation of each production step is provided on the Web through links from the manuscript tracking screen. Questions can be sent to `proc-query@ams.org`.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to `proc-query@ams.org` or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at www.ams.org/proc/procsubmit.html.
