PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9947

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using TEX and the $\mathcal{A}_{\mathcal{M}}\mathcal{S}$-TEX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 *Revision*) representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 311–316 (1989) are $682 list; $546 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25; subscribers in India must pay a postage surcharge of $48.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 78–280, $99 list, $79 institutional members; for Volumes 281–286, $114 list, $91 institutional members; for Volumes 287–292, $139 list, $111 institutional members; for Volumes 293–298, $155 list, $124 institutional members; for Volumes 299–304, $166 list, $133 institutional members; for Volumes 305–310, $169 list, $135 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy a chapter for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The owner consents to copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that a fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. When paying this fee please use the code 0002-9947/89 to refer to this publication. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

INDEX TO VOLUME 312

January–February 1989

Armitage, D. H. and Goldstein, M. *Quadrature and harmonic L^1-approximation in annuli*, 141.

Bañuelos, Rodrigo and Moore, Charles N. *Sharp estimates for the nontangential maximal function and the Lusin area function in Lipschitz domains*, 641.

Banyaga, Augustin, de la Llave, Rafael and Wayne, C. Eugene. *Cohomology equations and commutators of germs of contact diffeomorphisms*, 755.

Chicone, Carmen and Jacobs, Marc. *Bifurcation of critical periods for plane vector fields*, 433.

Chow, Shui-Nee and Deng, Bo. *Bifurcation of a unique stable periodic orbit from a homoclinic orbit in infinite dimensional systems*, 539.

Cohen, Amy and Kappeler, Thomas. *Nonuniqueness for solutions of the Korteweg-deVries equation*, 819.

Coifman, R. R. and Murray, M. A. M. *Uniform analyticity of orthogonal projections*, 779.

Dajczer, M. and Tenenblat, K. *Rigidity for complete Weingarten hypersurfaces*, 129.

Davis, James F. and Milgram, R. James. *Semicharacteristics, bordism, and free group actions*, 55.

Deng, Bo. See Chow, Shui-Nee

Dourmashkin, Peter. *A Poisson-Plancherel formula for the universal covering group with Lie algebra of type B_n*, 719.

Dow, Alan. *A separable space with no remote points*, 335.

Freese, Ralph. *Finitely presented lattices: canonical forms and the covering relation*, 841.

Gasper, George. *Summation, transformation, and expansion formulas for bibasic series*, 257.

Goldstein, M. See Armitage, D. H.

Gómez-Mont, Xavier. *Holomorphic foliations in ruled surfaces*, 179.

Gutierrez, Cristian E. *Harnack's inequality for degenerate Schrödinger operators*, 403.

Hill, Paul and Megibben, Charles. *Generalizations of the stacked bases theorem*, 377.

Jacobs, Marc. See Chicone, Carmen

Johnston, Bernard. *The uniform bound problem for local birational nonsingular morphisms*, 421.

Kaufman, R., Petrakis, Minos, Riddle, Lawrence H. and Uhl, J. J., Jr. *Nearly representable operators*, 315.

Kierstead, Henry A. and Nyikos, Peter J. *Hypergraphs with finitely many isomorphism subtypes*, 699.

de la Llave, Rafael. See Banyaga, Augustin

Maclachlan, C., Waterman, P. L. and Wielenberg, N. J. *Higher dimensional analogues of the modular and Picard groups*, 739.

Megibben, Charles. See Hill, Paul

Milgram, R. James. See Davis, James F.

Moore, Charles N. See Bañuelos, Rodrigo

Murray, M. A. M. See Coifman, R. R.

Nishimura, Takashi. *Topological types of finitely-C^0-K-determined map-germs*, 621.

Nyikos, Peter J. See Kierstead, Henry A.

Petkov, Vesselin M. and Stojanov, Luchezar N. *Singularities of the scattering kernel and scattering invariants for several strictly convex obstacles*, 203.

Petrakis, Minos. See Kaufman, R.

Pugh, Charles and Shub, Michael. *Ergodic attractors*, 1.

Reznick, Bruce. *Digital representations using the greatest integer function*, 355.

Riddle, Lawrence H. See Kaufman, R.

Rubin, Matatyahu. *On the reconstruction of topological spaces from their groups of homeomorphisms*, 487.

Ruttan, Arden and Varga, Richard S. *A unified theory for real vs. complex rational Chebyshev approximation on an interval*, 681.

Schechter, Martin. *The spectrum of the Schrödinger operator*, 115.

INDEX TO VOLUME 312

Selby, Alan M. *Determinacy of sufficiently differentiable maps*, 85.
Shiota, Masahiro. *Piecewise linearization of real-valued subanalytic functions*, 663.
Shub, Michael. See Pugh, Charles
Stojanov, Luchezar N. See Petkov, Vesselin M.
Tenenblat, K. See Dajczer, M.
Thomas, Robin. *Well-quasi-ordering infinite graphs with forbidden finite planar minor*, 279.
Uhl, J. J., Jr. See Kaufman, R.
Varga, Richard S. See Ruttan, Arden
Vernon, Micheal H. *Some families of isoparametric hypersurfaces and rigidity in a complex hyperbolic space*, 237.
Vrabec, Jože. *Deforming a PL submanifold of Euclidean space into a hyperplane*, 155.
Waterman, P. L. See Maclachlan, C.
Wayne, C. Eugene. See Banyaga, Augustin
Wielenbery, N. J. See Maclachlan, C.
Zhang, Tong and Zheng, Yuxi. *Two-dimensional Riemann problem for single conservation law*, 589.
Zheng, Yuxi. See Zhang, Tong

ABCDEFGHIJ - 89

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903.

Harmonic analysis, representation theory and Lie theory to ROBERT J. ZIMMER, Department of Mathematics, University of Chicago, Chicago, IL 60637.

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024.

Classical analysis (including complex, real, and harmonic) to EUGENE FABES, Department of Mathematics, University of Minnesota, Minneapolis, MN 55455.

Algebra, algebraic geometry, and number theory to DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713.

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Princeton University, Princeton, NJ 08544.

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395.

Probability and statistics to BURGESS DAVIS, Departments of Mathematics and Statistics, Purdue University, West Lafayette, IN 47907.

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602.

Logic, set theory, and general topology to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hannover, NH 03755.

Automorphic and modular functions and forms, geometry of numbers, multiplicative theory of numbers, zeta and L functions of number fields and algebras to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

All other communications to the editors should be addressed to the Managing Editor, RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

CONTENTS

Vol. 312, No. 2 April 1989 Whole No. 647

Bifurcation of critical periods for plane vector fields
By Carmen Chicone and Marc Jacobs 433
On the reconstruction of topological spaces from their groups of homeomorphisms
By Matatyahu Rubin 487
Bifurcation of a unique stable periodic orbit from a homoclinic orbit in infinite dimensional systems
By Shui-Nee Chow and Bo Deng 539
Two-dimensional Riemann problem for single conservation law
By Tong Zhang and Yuxi Zheng 589
Topological types of finitely-C^0-K-determined map-germs
By Takashi Nishimura 621
Sharp estimates for the nontangential maximal function and the Lusin area function in Lipschitz domains
By Rodrigo Bañuelos and Charles N. Moore 641
Piecewise linearization of real-valued subanalytic functions
By Masahiro Shiota 663
A unified theory for real vs. complex rational Chebyshev approximation on an interval
By Arden Ruttan and Richard S. Varga 681
Hypergraphs with finitely many isomorphism subtypes
By Henry A. Kierstead and Peter J. Nyikos 699
A Poisson-Plancherel formula for the universal covering group with Lie algebra of type B_n
By Peter Dourmashkin 719
Higher dimensional analogues of the modular and Picard groups
By C. Maclachlan, P. L. Waterman and N. J. Wielenberg 739
Cohomology equations and commutators of germs of contact diffeomorphisms
By Augustin Banyaga, Rafael de la Llave and C. Eugene Wayne 755
Uniform analyticity of orthogonal projections
By R. R. Coifman and M. A. M. Murray 779
Nonuniqueness for solutions of the Korteweg-deVries equation
By Amy Cohen and Thomas Kappeler 819
Finitely presented lattices: canonical forms and the covering relation
By Ralph Freese 841
