TABLE OF CONTENTS
VOLUME 60, JULY TO DECEMBER, 1946

BAER, R. Errata for Representations of groups as quotient groups. I.. 550
BELL, P. O. A study of the projective differential geometry of surfaces by means of a modified tensor analysis..... 22
BING, R. H. Concerning simple plane webs..... 133
BIRKHOFF, G., and BIRKHOFF, G. D. Distributive postulates for systems like Boolean algebras..... 3
GEORGE DAVID BIRKHOFF.....Frontispiece
BIRKHOFF, G. D., and BIRKHOFF, G. Distributive postulates for systems like Boolean algebras..... 3
BIRKHOFF, G. D., and LEWIS, D. C. Chromatic polynomials..... 355
BOURGIN, D. G. A class of sequences of functions..... 478
BRUCK, R. H. Contributions to the theory of loops..... 245
COHEN, I. S., and KAPLANSKY, I. Rings with a finite number of primes. I..... 468
DECICCO, J., and KASNER, E. Geometry of the Fourier heat equation.. 119
DUNFORD, N., and MILLER, D. S. On the ergodic theorem..... 538
FRINK, O. Complemented modular lattices and projective spaces of infinite dimension..... 452
HEINS, M. On the Phragmen-Lindelöf principle..... 238
HESTENES, M. R. The Weierstrass E-function in the calculus of variations..... 51
HESTENES, M. R. Theorem of Lindeberg in the calculus of variations.. 72
HESTENES, M. R. Sufficient conditions for the isoperimetric problem of Bolza in the calculus of variations..... 93
KAPLANSKY, I., and COHEN, I. S. Rings with a finite number of primes. I..... 468
KASNER, E., and DECICCO, J. Geometry of the Fourier heat equation.. 119
LANGER, R. E. George David Birkhoff, 1884–1944..... 1
LEWIS, D. C., and BIRKHOFF, G. D. Chromatic polynomials..... 355
MACCOLL, L. A. Geometrical characterizations of some families of dynamical trajectories..... 149
MACKEY, G. W. On convex topological linear spaces..... 519
MILLER, D. S. and DUNFORD, N. On the ergodic theorem..... 538
OXTOBY, J. C. Invariant measures in groups which are not locally compact..... 215
SHEN, Y. C. Interpolation to certain analytic functions by rational functions..... 12
TRJITZINSKY, W. J. Singular integral equations with Cauchy kernels.. 167
WONG, Y. C. Errata for Contributions to the theory of surfaces in a 4-space of constant curvature..... 550
Index, volumes 51–60..... 1–10

Fabian Bachrach

THE
AMERICAN MATHEMATICAL SOCIETY

dedicates this volume to

George David Birkhoff

in grateful memory of
his signal achievements in mathematical
research, his eminence as a guide and
inspirer of others, his leadership and
dynamic activity in the Society's work.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY
INDEX, VOLUMES 51–60
1942–1946

	Vol.	Pages
Adams, C. R., and Morse, A. P. On approximating certain integrals by sums	53_3	363–426
Agnew, R. P. Analytic extension by Hausdorff methods	52_2	217–237
Alaoglu, L., and Erdös, P. On highly composite and similar numbers	56_3	448–469
Albert, A. A. Quasigroups. I	54_3	507–519
—— Quasigroups. II	55_3	401–419
—— Errata for Quasigroups. II	56_3	570
—— On Jordan algebras of linear transformations	59_3	524–555
Albert, G. E., and Youngs, J. W. T. The structure of locally connected topological spaces	51_3	637–654
Alexandroff, P. On homological situation properties of complexes and closed sets	54_2	286–339
Allendoerfer, C. B., and Weil, A. The Gauss-Bonnet theorem for Riemannian polyhedra	53_1	101–129
Ambrose, W. Structure theorems for a special class of Banach algebras	57_3	364–386
Baer, R. A unified theory of projective spaces and finite abelian groups	52_2	283–343
—— A theory of crossed characters	54_1	103–170
—— The fundamental theorems of elementary geometry. An axiomatic analysis	56_1	94–129
—— Errata for The fundamental theorems of elementary geometry. An axiomatic analysis	56_3	570
—— Representations of groups as quotient groups. I	58_3	295–347
—— Representations of groups as quotient groups. II. Minimal central chains of a group	58_3	348–389
—— Representations of groups as quotient groups. III. Invariants of classes of related representations	58_3	390–419
—— Errata for Representations of groups as quotient groups. I	60_3	550
Bartels, R. C. F. Torsion of hollow cylinders	53_1	1– 13
Beckenbach, E. F., and Bing, R. H. On generalized convex functions	58_2	220–230
Beckenbach, E. F., and Reade, M. Mean-values and harmonic polynomials	53_2	230–238

	Vol.	Pages
Bell, E. T. Separable diophantine equations	57_1	86–101
Bell, P. O. A study of the projective differential geometry of surfaces by means of a modified tensor analysis	60_1	22– 50
Bergman, S. Linear operators in the theory of partial differential equations	53_1	130–155
—— Certain classes of analytic functions of two real variables and their properties	57_3	299–331
—— Errata for Certain classes of analytic functions of two real variables and their properties	58_3	474
—— A class of harmonic functions in three variables and their properties	59_2	216–247
Bergman, S., and Spencer, D. C. On distortion in pseudo-conformal mapping	51_1	133–163
Bernstein, B. A. Postulate-sets for Boolean rings	55_3	393–400
Bers, L., and Gelbart, A. On a class of functions defined by partial differential equations	56_1	67– 93
Bing, R. H. Concerning simple plane webs	60_1	133–148
Bing, R. H., and Beckenbach, E. F. On generalized convex functions	58_2	220–230
Birkhoff, G. Metric foundations of geometry. I	55_3	465–492
Birkhoff, G., and Birkhoff, G. D. Distributive postulates for systems like Boolean algebras	60_1	3– 11
George David Birkhoff	60_1	Frontispiece
Birkhoff, G. D., and Birkhoff, G. Distributive postulates for systems like Boolean algebras	60_1	3– 11
Birkhoff, G. D., and Lewis, D. C. Chromatic polynomials	60_3	355–451
Blumenthal, L. M. Metric characterization of elliptic space	59_3	381–400
Bourgin, D. G. A class of sequences of functions	60_3	478–518
Bourgin, D. G., and Mendel, C. W. Orthonormal sets of periodic functions of the type $\{f(nx)\}$	57_3	332–363
Brandt, A. J. The free Lie ring and Lie representations of the full linear group	56_3	528–536
Bruck, R. H. Some results in the theory of quasigroups	55_1	19– 52
—— Some results in the theory of linear non-associative algebras	56_2	141–199
—— Contributions to the theory of loops	60_2	245–354
Busemann, H. On spaces in which two points determine a geodesic	54_2	171–184
—— Local metric geometry	56_2	200–274
Cameron, R. H., and Martin, W. T. Infinite linear difference equations with arbitrary real spans and first degree		

	Vol.	Pages
coefficients	54_1	1– 22
—— Transformations of Wiener integrals under a general class of linear transformations	58_2	184–219
Chang, S. C. A new foundation of the projective differential theory of curves in five-dimensional space	59_1	132–165
Chevalley, C. Some properties of ideals in rings of power series	55_1	68– 84
—— Intersections of algebraic and algebroid varieties	57_1	1– 85
Christie, D. E. Net homotopy for compacta	56_2	275–308
Coburn, N. Congruences in unitary space	53_1	25– 40
Cohen, I. S. On the structure and ideal theory of complete local rings	59_1	54–106
Cohen, I. S., and Kaplansky, I. Rings with a finite number of primes. I	60_3	468–477
Day, M. M. Ergodic theorems for abelian semi-groups	51_2	399–412
—— Operations in Banach spaces	51_3	583–608
—— Arithmetic of ordered systems	58_1	1– 43
DeCicco, J. Dynamical and curvature trajectories in space	57_2	270–286
—— Equilong maps of the ∞^3 circles	59_1	42– 53
DeCicco, J., and Kasner, E. The general invariant theory of irregular analytic arcs or elements	51_2	232–254
—— A generalized theory of dynamical trajectories	54_1	23– 38
—— Geometry of the Fourier heat equation	60_1	119–132
Dilworth, R. P. Lattices with unique complements	57_1	123–154
Doob, J. L. Topics in the theory of Markoff chains	52_1	37– 64
—— Markoff chains—denumerable case	58_3	455–473
Doyle, T. C. Tensor theory of invariants for the projective differential geometry of a curved surface	55_2	306–348
Dunford, N. Spectral theory. I. Convergence to projections	54_2	185–217
Dunford, N., and Miller, D. S. On the ergodic theorem	60_3	538–549
Dunford, N., and Schatten, R. On the associate and conjugate space for the direct product of Banach spaces	59_3	430–436
Duthie, W. D. Segments of ordered sets	51_1	1– 14
Eilenberg, S., and MacLane, S. General theory of natural equivalences	58_2	231–294
Erdös, P. Note on the converse of Fabry's gap theorem	57_1	102–104
Erdös, P., and Alaoglu, L. On highly composite and similar numbers	56_3	448–469
Everett, C. J. Closure operators and galois theory in lattices	55_3	514–525
Everett, C. J., and Ulam, S. On ordered groups	57_2	208–216
Federer, H. Surface area. I	55_3	420–437

	Vol.	Pages
—— Surface area. II	55_3	438–456
—— The Gauss-Green theorem	58_1	44– 76
—— Coincidence functions and their integrals	59_3	441–466
Feller, W. Generalization of a probability limit theorem of Cramér	54_3	361–372
—— The general form of the so-called law of the iterated logarithm	54_3	373–402
—— Errata for On the integro-differential equations of the purely discontinuous Markoff processes	58_3	474
Fialkow, A. The conformal theory of curves	51_3	435–501
—— Conformal differential geometry of a subspace	56_2	309–433
—— Errata for Conformal differential geometry of a subspace	56_3	570
Fite, W. B. The degree of a linear homogeneous group	56_1	1– 6
Foster, A. L. The theory of Boolean-like rings	59_1	166–187
Friedrichs, K. O. The identity of weak and strong extensions of differential operators	55_1	132–151
Frink, O. Topology in lattices	51_3	569–582
—— Complemented modular lattices and projective spaces of infinite dimension	60_3	452–467
Gelbart, A., and Bers, L. On a class of functions defined by partial differential equations	56_1	67– 93
Gorn, S. Homomorphisms and modular functionals	51_1	103–116
Greville, T. N. E. Regularity of label-sequences under configuration transformations	54_3	403–413
Grove, V. G. A general theory of surfaces and conjugate nets	57_1	105–122
Hall, M. Projective planes	54_2	229–277
Halmos, P. R. Approximation theories for measure preserving transformations	55_1	1– 18
Hay, G. E. The finite displacement of thin rods	51_1	65–102
Hedlund, G. A., and Morse, M. Manifolds without conjugate points	51_2	362–386
Heins, M. H. On a problem of Walsh concerning the Hadamard three circles theorem	55_3	349–372
—— On the Phragmén-Lindelöf principle	60_2	238–244
Helsel, R. G., and Radó, T. The transformation of double integrals	54_1	83–102
Herriot, J. G. Nörlund summability of double Fourier series	52_1	72– 94
Herzberger, M. J. Direct methods in geometrical optics	53_2	218–229
Hestenes, M. R. The Weierstrass E-function in the calculus of variations	60_1	51– 71

	Vol.	Pages
—— Theorem of Lindeberg in the calculus of variations....	60_1	72– 92
—— Sufficient conditions for the isoperimetric problem of Bolza in the calculus of variations.....	60_1	93–118
Hille, E. On the oscillation of differential transforms. II. Characteristic series of boundary value problems.....	52_3	463–497
—— Remarks on ergodic theorems.....	57_2	246–269
Holtom, C. Permanent configurations in the n-body problem	54_3	520–543
Hua, L. K. On the number of partitions of a number into unequal parts.....	51_1	194–201
—— On the distribution of quadratic non-residues and the euclidean algorithm in real quadratic fields. I.....	56_3	537–546
—— Geometries of matrices. I. Generalizations of von Staudt's theorem.....	57_3	441–481
—— Geometries of matrices. I_1. Arithmetical construction..	57_3	482–490
—— Errata for Geometries of matrices. I. Generalizations of von Staudt's theorem.....	58_3	474
—— Orthogonal classification of Hermitian matrices.....	59_3	508–523
Hua, L. K., and Min, S. H. On the distribution of quadratic non-residues and the euclidean algorithm in real quadratic fields. II.....	56_3	547–569
Jackson, D. The boundedness of certain sets of orthonormal polynomials in one, two, and three variables.....	58_2	167–183
Jacobson, N. Structure theory of simple rings without finiteness assumptions.....	57_2	228–245
Johnson, R. E. On structures of infinite modules.....	53_3	469–489
Kac, M. On the average of a certain Wiener functional and a related limit theorem in calculus of probability.....	59_3	401–414
Kaplansky, I., and Cohen, I. S. Rings with a finite number of primes. I.....	60_3	468–477
Kasner, E., and DeCicco, J. The general invariant theory of irregular analytic arcs or elements.....	51_2	232–254
—— A generalized theory of dynamical trajectories.....	54_1	23– 38
—— Geometry of the Fourier heat equation.....	60_1	119–132
Kelley, J. L. Hyperspaces of a continuum.....	52_1	22– 36
Kershner, R. The continuity of functions of many variables.....	53_1	83–100
Kleene, S. C. Recursive predicates and quantifiers.....	53_1	41– 73
Kober, H. On the approximation to integrable functions by integral functions.....	54_1	70– 82
—— Approximation by integral functions in the complex domain.....	56_1	7– 31

	Vol.	Pages
Kohn, W. Contour integration in the theory of the spherical pendulum and the heavy symmetrical top	59_1	107–131
Kolchin, E. R. On the basis theorem for differential systems	52_1	115–127
Langer, R. E. A theory for ordinary differential boundary problems of the second order and of the highly irregular type	53_2	292–361
