# Placement Process

# Placement Process

Proper math placement is very important.

# Placement Process

Proper math placement is very important.

Placement at Michigan involves two (or three, depending on how you count) steps:

# Placement Process

Proper math placement is very important.

Placement at Michigan involves two (or three, depending on how you count) steps:

- 1 On-line placement exam.

# Placement Process

Proper math placement is very important.

Placement at Michigan involves two (or three, depending on how you count) steps:

- 1 On-line placement exam. (ready/not ready for calculus)

# Placement Process

Proper math placement is very important.

Placement at Michigan involves two (or three, depending on how you count) steps:

- 1 On-line placement exam. (ready/not ready for calculus)
- 2 Each incoming student comes to campus for three days of orientation

# Placement Process

Proper math placement is very important.

Placement at Michigan involves two (or three, depending on how you count) steps:

- 1 On-line placement exam. (ready/not ready for calculus)
- 2 Each incoming student comes to campus for three days of orientation
  - 1 For placement in standard calculus sequence, see GSI.

# Placement Process

Proper math placement is very important.

Placement at Michigan involves two (or three, depending on how you count) steps:

- 1 On-line placement exam. (ready/not ready for calculus)
- 2 Each incoming student comes to campus for three days of orientation
  - 1 For placement in standard calculus sequence, see GSI.
  - 2 If extremely interested in math, see a faculty member for placement.

# Placement Process
