Blvd, Melbourne, FL 32901, and **Tenali Gnana Bhaskar**. *Generalized Quasilinearization Method For Semilinear Hyperbolic Problems*. Preliminary report.

In this talk, we will consider quasilinear hyperbolic problem associated with a second order partial differential operator in its divergence form. We will first state a comparison theorem and give the highlights of the prove and then apply the method of generalized quasilinearization. (Received October 03, 2000)
