Richard DeVault, LA, **Witold Kosmala**, NC, and **Gerry Ladas** and **Stephen Schultz***
(sschultz@providence.edu), RI. *Global Stability of $X(n+1) = (a+bX(n-k))/(AX(n)+BX(n-k))$.*
Preliminary report.

We investigate the global stability and the periodic character of solutions in the title with nonnegative parameters and positive initial conditions. (Received October 03, 2000)
