C.S. Felicitas* (HelloQED@netscape.net), 527 Third Avenue RM.263C, Manhattan, NY 10016,
and **M.W. Auslander**, , Lewiston, ME. *Exercise, Fitness, and Case Examples for Recent
Application.*

Large data populations exhibit field activity that is often perceived as chaotic. However, executive field functions are applicable as routine and stabilization activities to support such data. Several cases are reviewed. The Fontaine context is reviewed and future forcing condition enumerated. Progress to date is explored. (Received September 26, 2000)
