962-I1-303 **Herbert E Kasube*** (`hkasube@hilltop.bradley.edu`), department of Mathematics, Bradley University, Peoria, IL 61625. *The History of Mathematics as a Seminar.*
The history of mathematics lends itself very nicely to presentation in a seminar setting. The author will share some of his experiences teaching a one-hour mathematics seminar for which the history of mathematics was the basis. There have been some positive experiences as well as some negative. Recommendations for how to incorporate the history of mathematics into a seminar will also be discussed. (Received September 08, 2000)
