1003-X1-1266      **Jim Fulmer\*** (jrfulmer@ualr.edu), Department of Mathematics & Statistics, UALR, 2801 South University Ave, Little Rock, AR 72204-1099. *Assessment Central— An Online Web-based Tool for Use in Program Assessment.*

Program assessment has been an ongoing process at the University of Arkansas at Little Rock for several years. In an effort to improve the flow of information about assessment of the various degree programs, the campus instituted an Assessment Central project. The goal is to provide an ongoing, online mechanism for accessing and sharing information about program assessment among the various degree programs on campus. This talk will feature an online exhibit of the various facets of the Assessment Central project. What are the components of the online, web-based Assessment Central project? What are the computer links between the various components? What information is contained in each of the components? How does the information on the Assessment Central website change each year? This session will focus on a discussion of these issues and how they relate to program/outcomes assessment. (Received October 04, 2004)
