1014-54-1569 **Sheldon W Davis\*** (`davissw@muohio.edu`), Math and Stat, Miami University, Oxford, OH 45056. *Covering properties of symmetrizable spaces.* Preliminary report.

We present new examples and results done with Dimitrina Stavrova on weak covering properties of symmetrizable spaces. The properties are of the almost Lindelöf and weakly Lindelöf type and are relevant to certain cardinal invariant questions. (Received September 28, 2005)
