Jerry A Johnson* (jerryj@unr.edu), Department of Mathematics, University of Nevada, Reno, NV 89557. *Resources for QL: Mathematics Across the Curriculum and the National Numeracy Network at the University of Nevada.*

This talk will discuss some QL resources that came from two projects at the University of Nevada, Reno.

Mathematics Across the Curriculum is a program started in 1993 at the University of Nevada (supported in part by NSF grants DUE-9254243, DUE-9354652, and DUE-9451171). Several resources that came from this project are on the web. Among them are examples of competency exams, assignments, accounts of instructor experiences, and links to other sites. In the true QL spirit, a great many of these examples come from courses in disciplines other than mathematics. They include two videos that may be ordered free on this web site. <http://www.unr.edu/mathcenter/mac/>

The National Numeracy Network <http://math.dartmouth.edu/nnn/NNNHome.html> is a non-profit organization whose general purpose is to promote QL. It got its start through the Woodrow Wilson Foundation and the Pew Charitable Trusts. Thanks to a small grant from them, a team at the University of Nevada produced some QL materials that are posted on the web at <http://unr.edu/homepage/jerryj/NNN/QL.html> (Received August 24, 2005)
