Generalizing techniques found in Ozawa and Popa, “On a class of  $II_1$  factors with at most one Cartan subalgebra, II” (Amer. J. Math., 2010), we show that the group factors of ICC lattices in  $SO(n, 1)$  and  $SU(n, 1)$ ,  $n \geq 2$ , are strongly solid. (Received September 17, 2010)
