**Anant Godbole\*** (godbolea@etsu.edu), ESTU Math Department, Box 70663, Johnson City, TN 37614. *Teaching Introductory Statistics in Thirteen Formats*. Preliminary report.

At East Tennessee State University, most students are required to take Introductory Statistics as a general education class. Through a combination of innovation, necessity, and opportunity, we now offer thirteen different versions of this class. These include the Regular, Dual Enrollment, Stretch, 5 hour, Three-week, Biologically Enhanced, On-line, Governor School, In-Service Teacher, Pre-Service Teacher, Add-On, Honors, and The Three Stooges versions. This talk will examine the need for each version, and explain key differences and similarities. (Received June 01, 2010)
