Stephan Ramon Garcia* (stephan.garcia@pomona.edu), Department of Mathematics,
Pomona College, 610 N. College Ave, Claremont, CA 91711. *C*-algebras generated by truncated
Toeplitz operators.*

We discuss an analogue of Coburn's description of the Toeplitz algebra in the setting of *truncated Toeplitz operators*, a class of operators whose study has been largely motivated by a seminal 2007 paper of Sarason. As a byproduct, we are able to shed some light on the relationship between *complex symmetric operators* and truncated Toeplitz operators. This is joint work with William T. Ross and Warren R. Wogen.
