

1086-97-2013 **Ben McCarty*** (bmmccrt1@memphis.edu). *Quality Problems Through Collaboration*. Preliminary report.

A collaborative effort between educators and mathematicians has the potential to produce tasks that probe deep levels of understanding, and guide students toward the goals laid out by the Common Core State Standards for Mathematics. We will look at the impact such collaboration is having on the production of quality tasks for the Illustrative Mathematics Project. (Received September 24, 2012)
