Christopher Garrett Mouron* (mouronc@rhodes.edu), Department of Mathematics and Computer Sci., 2000 North Parkway, Memphis, TN 38112. *Entropy of shift maps of the pseudo-arc.*

I will show that if $f : I \rightarrow I$ is a map such that $\varprojlim(f, I)$ is the pseudo-arc, then the entropy of f is either 0 or ∞ . Some other stronger results are also shown. (Received August 29, 2008)
