1125-03-2344 **Monica M VanDieren*** (`vandieren@rmu.edu`), Department of Mathematics, RMU, 6000 University Blvd, Moon Township, PA 15146. *Symmetry and Superstability in Abstract Elementary Classes.*

In this talk I will survey some of the recent developments in understanding superstability in abstract elementary classes. In particular, I will describe the concept of symmetry and how it has been used to answer several open questions and tie together research on good frames with tame classes.
