1125-46-2774   **Sarah A Reznikoff*** (`sarahrez@ksu.edu`), 138 Cardwell Hall, Mathematics Department, Manhattan, KS 66506. *Recent advances in combinatorially-defined C*-algebras.* Preliminary report.

The last decade has seen great progress in the field of combinatorially-defined C*-algebras. In particular, new uniqueness theorems have been proved for graph algebras, k-graph algebras, and groupoids. In this talk we give an overview of this work and present results in several new directions. (Received September 20, 2016)
