**Peter Linnell, Boris Okun\*** (okun@uwm.edu) and **Thomas Schick**. *The strong Atiyah Conjecture for RA Artin and Coxeter groups.*

The Strong Atiyah Conjecture predicts possible denominators for the  $L^2$ -Betti numbers for groups with torsion. I will explain some of the ingredients of its proof for RA Artin and Coxeter groups. (Received June 23, 2011)
