**Gopala Krishna Srinivasan\*** (gopal@math.iitb.ac.in), Department of Mathematics, Indian Institute of Technology Bombay, Powai, Mumbai, 400076, India, and **Peter Zvengrowski**. *On the horizontal monotonicity of the gamma function.*

The absolute value of the gamma function when restricted to horizontal lines in the upper half plane is a monotone function as soon as the ordinate crosses a threshold value. This curious property seems to have been overlooked in the vast literature on the gamma function. A proof of this result was published in 2012 in the Canadian Mathematical Bulletin by the present author and Peter Zvengrowski. (Received July 04, 2014)
