Alan Wiggins* (adwiggin@umich.edu), Department of Mathematics & Statistics, 2014 CASL Building, 4901 Evergreen Road, Dearborn, MI 48128. *C* Algebras Generated By Composition and Toeplitz Operators*. Preliminary report.

Let \mathbb{D} denote the open unit disk in \mathbb{C} . We examine C^* -algebraic properties of the algebras generated by certain composition and Toeplitz operators on either the Hardy or Bergman spaces associated to \mathbb{D} . This is joint work with John Clifford and Yunus Zeytuncu. (Received July 28, 2014)
