Robin D Tucker-Drob* (rtuckerd@math.rutgers.edu), Department of Mathematics, Rutgers University, 110 Frelinghuysen Rd., Piscataway, NJ 08854-8019. *On the cost of generating an inner amenable group.*

I will discuss recent results on structural properties of groups which possess an atomless inner invariant mean, and I will sketch how these properties imply that all free measure preserving actions of ICC inner amenable groups have cost 1. (Received February 02, 2014)
