Hasan Coskun* (hasan.coskun@tamuc.edu), 2600 S Neal St, Commerce, TX 75429. A
Combinatorial Formula for Rational Macdonald Functions and Applications.

We present a combinatorial formula for a class of rational Macdonald functions used in our definition of multiple binomial coefficients, and other sequences of multiple combinatorial numbers. The combinatorial interpretation is then used to establish combinatorial formulas for certain families of multiple qt-numbers constructed in two recent papers by the author.
