**Mustafa Hajij\*** (mhajij@usf.edu), Tampa, FL 33647, and **Mohamed Elhamdadi**  
(emohamed@mail.usf.edu), Tampa, FL 33647. *Pretzel Links and q-Series*. Preliminary report.

The tail of the colored Jones polynomial is a  $q$ -power series alternating knot invariant. It has been shown that the tail of the colored Jones polynomial of  $(2,p)$  torus knots give the Andrews Gordon identities for the two variable Ramanujan theta function as well as corresponding identities for the false theta function. In this talk we show some  $q$ -series identities that one can obtain from pretzel links. (Received August 31, 2015)
