**Riad Masri\*** ([masri@math.tamu.edu](mailto:masri@math.tamu.edu)) and **Adrian Barquero-Sanchez**. *Effective nonvanishing of CM biquadratic L-functions.*

I will describe an effective nonvanishing theorem for L-functions associated to class group characters of CM biquadratic fields. The proof relies on an effective zero-free region for Hilbert modular Eisenstein series over real quadratic fields. (Received February 27, 2017)
