Weiwei Wu* (mathwww@gmail.com) and **Cheuk-Yu Mak**. *Monotone Viterbo functoriality and subcritical handle attachments.*

We will explain a version of Viterbo functoriality in monotone symplectic manifolds for both the open and closed string cases. This implies the invariance of Fukaya category of an open monotone symplectic manifold under subcritical handle attachments. This is a joint work with Cheuk-Yu Mak. (Received August 26, 2016)
