**Tristan Buckmaster** and **Pierre Germain\***, pgermain@cims.nyu.edu, and **Zaher Hani** and **Jalal Shatah**. *The big box limit for the nonlinear Schrodinger equation.*

I will present results, obtained in collaboration with T. Buckmaster, Z. Hani, and J. Shatah, on the big box limit for NLS on the torus. I will consider either deterministic, or random data, and compare these two cases. (Received March 16, 2017)
