Zhuo Chen* (zchen@math.tsinghua.edu.cn), Department of Math, Tsinghua University, Beijing, Beijing 100084, Peoples Rep of China. *On the ∂ - and $\bar{\partial}$ -Operators of a Generalized Complex Structure.*

We prove that the ∂ - and $\bar{\partial}$ -operators introduced by Gualtieri for a generalized complex structure coincide with the d_* - and ∂_* -operators introduced by Alekseev-Xu for Evens-Lu-Weinstein modules of a Lie bialgebroid. (Received August 27, 2017)
