**Jesse Elliott\*** ([jesse.elliott@csuci.edu](mailto:jesse.elliott@csuci.edu)). *Unique factorization in rings with zerodivisors.*

We discuss several competing generalizations of the notion of a unique factorization domain to rings with zerodivisors. We provide some new results that suggest that the "best" such notion is that of a Krull ring with trivial divisor class group. (Received December 11, 2018)
