Jesse L Taylor* (jesse.taylor@angelo.edu), 2601 W AVE N, Department of Mathematics,
San Angelo, TX 76909. *Graphic matroids that guarantee their duals as minors.*

A natural question for matroids follows: Which matroids N guarantee that, when present as minors in a larger matroid M , their duals are also present as minors? The main result of this talk addresses this question with the additional constraints that N and M are 3-connected and graphic. (Received January 29, 2018)
