Sarah Holliday* (shollid4@kennesaw.edu), 1000 Chastain Road, Kennesaw, GA 30144, and
Steve Hedetniemi and **Pete Johnson**. *Distinct Representatives in Special Set Families in
Graphs*. Preliminary report.

In 2017, Hedetniemi asked the question “for which graphs G does the indexed family $\{N_G(v)|V \in V(G)\}$ of open neighborhoods have a system of distinct representatives?” In our previous work, we answered that question, and explored necessary conditions and associated parameters. Now, we move on to other special set families in graphs and examine whether they do or do not have a system of distinct representatives. (Received January 22, 2019)
