**Edward F. Price III\*** ([price79@purdue.edu](mailto:price79@purdue.edu)). *Rees Algebras of Grade 3 Gorenstein Ideals*. Preliminary report.

This talk will discuss the Rees algebras of grade 3 Gorenstein ideals that are not necessarily linearly presented. In this endeavor, we also investigate the fibers of morphisms of rational maps defined by the generators of such ideals. (Received January 25, 2019)
