Miklos Z Racz* (mracz@princeton.edu). *Correlated graph matching in growing graphs*. Preliminary report.

I will discuss a natural model of correlated graph matching in randomly growing graphs. I will focus on the questions of detection and estimation, and discuss connections to recent work on the influence of the seed graph in randomly growing graphs. This is based on joint work with Anirudh Sridhar. (Received August 16, 2019)
