Khazhakanush@gmail.com. *The positive Schur property on spaces of regular multilinear operators.* Preliminary report.

In this paper we give necessary and sufficient conditions for the space of regular multilinear operators from the product of Banach lattices to a Dedekind complete Banach lattice to have the positive Schur property. We also characterize the positive Schur property on the positive projective m -fold tensor product of Banach lattices, $m \in \mathbb{N}$, and on its dual. (Received August 03, 2020)
