Will Johnson (willij6@berkeley.edu), **Chieu-Minh Tran*** (mtran6@nd.edu), **Erik Walsberg** (ewalsber@uci.edu) and **Vincent Yinhe Ye** (jinhe.ye.15@nd.edu). *Canonical topologies over fields*. Preliminary report.

We obtain common characterizations of the Zariski topologies over algebraically closed fields, the Euclidean topologies over real closed fields, and the valuation topologies over p-adically closed fields. We then show that some of these characterizations coincide in more general settings. In particular, this provides us with canonical topologies over pseudo-finite fields. (Received February 01, 2020)
