Renzo Cavalieri* (renzo@math.colostate.edu), 1874 campus mail, Fort Collins, CO 80523,
and **Hannah Markwig** and **Andreas Gross**. *Tropical psi classes*.

We introduce a tropical geometric framework that allows us to define ψ classes for moduli spaces of tropical curves of arbitrary genus. We prove correspondence theorems between algebraic and tropical ψ classes for some one-dimensional families of genus-one tropical curves. (Received January 18, 2021)
