**Elaina K Aceves\*** (elaina-aceves@uiowa.edu). *Reproving Birman and Menasco's 3-braid Classification Theorem.*

In 1993, Birman and Menasco proved using braid foliation techniques that all 3-braids are either in a unique conjugacy class or admit a flype move. In this talk, I will discuss our efforts to reprove this theorem using measured train tracks and Agol cycles. This is joint work with Keiko Kawamuro. (Received January 19, 2021)
