David Chan* (dmchan@vcu.edu), **Michael Broda**, **Hollee McGinnis**, **Claire Luce**, **Jeremy Winslow**, **Joy Ma** and **Haya Hamid**. *The effects of prime supporting nodes in ego-centric graph of college students.*

In this talk I describe the construction of ego-centric graphs created from the collected of data from college student at Virginia Commonwealth University. Half of the egocentric graphs contained prime supporting nodes. We examine the impact having these nodes on students' educational success and mental health. (Received January 19, 2021)
