Christopher Drupieski and **Jonathan Kujawa***, Dept. of Mathematics, University of Oklahoma, Norman, OK 73069. *Support varieties for modular Lie superalgebras.*

Since the late 1900s support varieties have been a powerful tool for the study of representations over fields of positive characteristic. I will discuss recent work on bringing these tools to the representation theory of modular Lie superalgebras. (Received September 19, 2021)
