Hyungjun Kim, Sungjong No* (sungjongno@kyonggi.ac.kr) and **Hyungkee Yoo.** *The folded ribbon length of twisted torus knots and 2-bridge knots.*

The folded ribbon length $Rib(K)$ of a knot K is the infimum value of the ratio of the length of any ribbon with core to its width. In this talk, we introduce the upper bound of ribbon length of twisted torus knots and 2-bridge link. (Received September 20, 2021)
