

1176-11-135 **Eun Hye Lee***, Department of Mathematics Room 4-117, Stony Brook University, Stony Brook, NY 11794. *Subconvexity of Shintani Zeta Functions.*

Subconvexity is one of the central interests in the theory of zeta functions. In this talk, I will introduce the problem of subconvexity, and discuss a recent result of subconvexity of Shintani zeta functions. Joint work with Robert Hough. (Received January 18, 2022)
