This volume is dedicated to the memory of Alec Matheson. Alec was a major contributor to this field, and he collaborated with several of the authors represented in this volume. Alec is remembered as a highly respected mathematician, valued colleague and friend.
Contents

Preface ix
A note on the life of Alec Matheson and some of his work
JOSEPH A. CIMA 1
On the inverse of an analytic mapping
JOSEPH A. CIMA 5
Isometric composition operators on the Bloch space in the polydisc
JOEL COHEN and FLAVIA COLONNA 9
Pluripolarity of manifolds
OLEG EROSHKIN 23
On a question of Brézis and Korevaar concerning a class of square-summable sequences
RICHARD Fournier and Luis Salinas 35
Approximating $\overline{z}$ in Hardy and Bergman Norms
ZDEŇKA GUADARRAMA and DMITRY KHavinSON 43
A general view of multipliers and composition operators II
DON HadWIN and Eric NORDGREN 63
A general view of BMO and VMO
DON HadWIN and HassAN YoUSEFI 75
Order bounded weighted composition operators
R. A. HIBSCHWEILER 93
Fractional Cauchy transforms and composition
T. H. MacGRgor 107
Continuous functions in star-invariant subspaces [The Abstract]
ALEC Matheson 117
Indestructible Blaschke products
WILLIAM T. Ross 119
On Taylor coefficients and multipliers in Fock spaces
JAMES Tung 135
Preface

Banach spaces of analytic functions play an important role in both classical and modern analysis. In this Proceedings, the major focus is on spaces of functions analytic in the open unit disc, such as the Hardy spaces, the Bergman spaces, and the weighted versions of these spaces. Other spaces under consideration here include the Bloch space, the families of Cauchy transforms and fractional Cauchy transforms, BMO, VMO, and the Fock space. Some of the work deals with questions in several complex variables.

One of the themes of the Proceedings is the notion of multiplication operators, composition operators and weighted composition operators acting on Banach spaces. This has been a topic of extensive research over the past twenty years. The Proceedings includes results characterizing bounded, compact and isometric composition operators in various settings.

The recently published book “The Cauchy Transform” (2006) by Joseph A. Cima, Alec L. Matheson and William T. Ross, deals with material that is central to this Proceedings. A related book “Fractional Cauchy Transforms” (2006) was written by the editors of this Proceedings. Research by these authors is part of the Proceedings. The articles here were generated by the Special Session on Banach Spaces of Analytic Functions, held as part of the regional AMS meeting at the University of New Hampshire in April, 2006. It was very unfortunate that Alec Matheson, a major contributor to this field, died shortly before the meeting after a long illness. A brief note on the life of Alec Matheson, including several of his results with various collaborators, was prepared by Joseph Cima and is included here.

This volume presents both expository and research articles. Several authors conclude their articles with open questions.

The Special Session on Banach Spaces of Analytic Functions brought together thirty mathematicians, mostly from the northeastern United States. We hope that this volume serves to communicate more broadly the research presented at the meeting.
Titles in This Series

452 Matthias Beck, Christian Haase, Bruce Reznick, Michèle Vergne, Volkmar Welker, and Ruriko Yoshida, Editors, Integer points in polyhedra, 2008
451 David R. Larson, Peter Massopust, Zuhair Nashed, Minh Chuong Nguyen, Manos Papadakis, and Ahmed Zayed, Editors, Frames and operator theory in analysis and signal processing, 2008
450 Giuseppe Dito, Jiang-Hua Lu, Yoshiaki Maeda, and Alan Weinstein, Editors, Poisson geometry in mathematics and physics, 2008
448 Alberto Corso, Juan Migliore, and Claudia Polini, Editors, Algebra, geometry and their interactions, 2007
447 François Germinet and Peter Hislop, Editors, Adventures in mathematical physics, 2007
445 Laura De Carli and Mario Milman, Editors, Interpolation Theory and Applications, 2007
443 Joseph Stephen Verducci and Xiaotong Shen, Editors, Prediction and discovery, 2007
442 Yi-Zhi Huang and Kailash C Misra, Editors, Lie algebras, vertex operator algebras and their applications, 2007
440 Fernanda Botelho, Thomas Hagen, and James Jamison, Editors, Fluids and Waves, 2007
439 Donatella Danielli, Editor, Recent developments in nonlinear partial differential equations, 2007
438 Marc Burger, Michael Farber, Robert Grist, and Daniel Koditschek, Editors, Topology and robotics, 2007
437 José C. Mourão, João P. Nunes, Roger Picken, and Jean-Claude Zambrini, Editors, Prospects in mathematical physics, 2007
436 Luchezar L. Avramov, Daniel Christensen, William G Dwyer, Michael A Mandell, and Brooke E Shipley, Editors, Interactions between homotopy theory and algebra, 2007
435 Krzysztof Jarosz, Editor, Function spaces, 2007
434 S. Paycha and B. Uribe, Editors, Geometric and topological methods for quantum field theory, 2007
433 Pavel Etingof, Shlomo Gelaki, and Steven Shnider, Editors, Quantum groups, 2007
432 Dick Canery, Jane Gilman, Juha Heinonen, and Howard Masur, Editors, In the tradition of Ahlfors-Bers, IV, 2007
431 Michael Batanin, Aleksei Davydov, Michael Johnson, Stephen Lack, and Amnon Neeman, Editors, Categories in algebra, geometry and mathematical physics, 2007
Titles in this series

430 Idris Assani, Editor, Ergodic theory and related fields, 2007
429 Gui-Qiang Chen, Elton Hsu, and Mark Pinsky, Editors, Stochastic analysis and partial differential equations, 2007
427 Anastasios Mallios and Marina Haralampidou, Editors, Topological algebras and applications, 2007
425 Su Gao, Steve Jackson, and Yi Zhang, Editors, Advances in Logic, 2007
423 Christos A. Athanasiadis, Victor V. Batyrev, Dimitrios I. Dais, Martin Henk, and Francisco Santos, Editors, Algebraic and geometric combinatorics, 2007
422 JongHae Keum and Shigeyuki Kondo, Editors, Algebraic geometry, 2007
421 Benjamin Fine, Anthony M. Gaglione, and Dennis Spellman, Editors, Combinatorial group theory, discrete groups, and number theory, 2007
420 William Chin, James Osterburg, and Declan Quinn, Editors, Groups, rings and algebras, 2006
419 Dinh V. Huynh, S. K. Jain, and S. R. López-Permouth, Editors, Algebra and Its applications, 2006
418 Lothar Gerritzen, Dorian Goldfeld, Martin Kreuzer, Gerhard Rosenberger, and Vladimir Shpilrain, Editors, Algebraic methods in cryptography, 2006
417 Vadim B. Kuznetsov and Siddhartha Sahi, Editors, Jack, Hall-Littlewood and Macdonald polynomials, 2006
416 Toshihide Kohno and Masanori Morishita, Editors, Primes and knots, 2006
415 Gregory Berkolaiko, Robert Carlson, Stephen A. Fulling, and Peter Kuchment, Editors, Quantum graphs and their applications, 2006
414 Deguang Han, Palle E. T. Jorgensen, and David Royal Larson, Editors, Operator theory, operator algebras, and applications, 2006
413 Georgia M. Benkart, Jens C. Jantzen, Zongzhu Lin, Daniel K. Nakano, and Brian J. Parshall, Editors, Representations of algebraic groups, quantum groups and Lie algebras, 2006
412 Nikolai Chernov, Yulia Karpeshina, Ian W. Knowles, Roger T. Lewis, and Rudi Weikard, Editors, Recent advances in differential equations and mathematical physics, 2006
410 Abba Gumel, Carlos Castillo-Chavez, Ronald E. Mickens, and Dominic P. Clemence, Editors, Mathematical studies on human disease dynamics: Emerging paradigms and challenges, 2006
409 Juan Luis Vázquez, Xavier Cabré, and José Antonio Carrillo, Editors, Recent trends in partial differential equations, 2006
408 Habib Ammari and Hyeonbae Kang, Editors, Inverse problems, multi-scale analysis and effective medium theory, 2006

This volume is focused on Banach spaces of functions analytic in the open unit disc, such as the classical Hardy and Bergman spaces, and weighted versions of these spaces. Other spaces under consideration here include the Bloch space, the families of Cauchy transforms and fractional Cauchy transforms, BMO, VMO, and the Fock space. Some of the work deals with questions about functions in several complex variables.

Multiplication operators, composition operators and weighted composition operators form a central topic of the volume. This topic has been an extensive area of research for the past twenty years. This volume includes results characterizing bounded, compact and isometric composition operators in various settings.

Graduate students who are interested in analysis will find an overview of current work in the field. Specialists will find interesting questions and new methods, as well as familiar ideas (such as composition operators) seen in new settings or in more general form. Mathematicians with an interest in modern analysis will gain insight into the interplay between function theory and operator theory which is central to this work.
