TABLE OF CONTENTS

Algebraic K - and L -Theory

A. HATCHER, Concordance spaces, higher simple-homotopy theory, and applications	3
J. B. WAGONER, Diffeomorphisms, K_2 , and analytic torsion	23
FRIEDHELM WALDHAUSEN, Algebraic K -theory of topological spaces. I	35
J. P. ALEXANDER, P. E. CONNER and G. C. HAMRICK, Metabolic and hyperbolic forms	61
JEAN-CLAUDE HAUSMANN and PIERRE VOGEL, The plus construction and lifting maps from manifolds	67

Surgery and its Applications

R. JAMES MILGRAM, A survey of the classifying spaces associated to spherical fiberings and surgery	79
IB MADSEN, Remarks on normal invariants from the infinite loop space viewpoint	91
GREGORY BRUMFIEL, Remarks on smoothing theory	103
C. T. C. WALL, Free actions of finite groups on spheres	115
C. B. THOMAS, Free actions by finite groups on S^3	125
LOWELL JONES, The nonsimply connected characteristic variety theorem	131
JOHN JONES and ELMER REES, Kervaire's invariant for framed manifolds	141
YOUN W. LEE, Surgery on diffeomorphism	149
REINHARD SCHULTZ, Smooth actions of small groups on exotic spheres	155
R. J. MILGRAM and I. HAMBLETON, An obstruction to Poincaré transversality	161

Group Actions

TED PETRIE, Pseudoequivalences of G -manifolds	169
R. LASHOF and M. ROTHENBERG, G -smoothing theory	211
MEL ROTHENBERG, Torsion invariants and finite transformation groups	267
M. DAVIS, W. C. HSIANG and W. Y. HSIANG, Differential actions of compact simple Lie groups on homotopy spheres and Euclidean spaces	313
F. T. FARRELL and W. C. HSIANG, On the rational homotopy groups of the diffeomorphism groups of discs, spheres, and aspherical manifolds	325
ROBERT OLIVER, Group actions on disks, integral permutation representations, and the Burnside ring	339

TABLE OF CONTENTS

DAN BURGHELEA, Automorphisms of manifolds	347
I. BERSTEIN and J. E. WEST, Based free compact Lie group actions on Hilbert cubes	373
P. E. CONNER and FRANK RAYMOND, Realizing automorphisms of π_1 by homeomorphisms	393
FRANCIS X. CONNOLLY, Group actions, vector fields, and characteristic numbers	401
RAVINDRA S. KULKARNI, Infinite regular coverings and Kleinian groups	407

PREFACE

The American Mathematical Society held its 24th Summer Research Institute at Stanford University from August 2–21, 1976. The topic of the meeting was Algebraic and Geometric Topology. Particular emphasis was placed on Algebraic K - and L -Theory, Surgery and Surgery Classifying Spaces, Group Actions on Manifolds, and 3 and 4 Manifold Theory.

The organizing committee consisted of Raoul Bott, William Browder (Co-chairman), Pierre Conner, Robion Kirby, Richard Lashof, R. James Milgram (Chairman), Daniel Quillen, and P. Emery Thomas (Co-chairman).

The main lecturers were Raoul Bott, Richard Lashof and Mel Rothenberg, Sylvain Cappell and Julius Shaneson, C. McA. Gordon, Robert Edwards, Allen Hatcher and Jack Wagoner, Wu. C. Hsiang, Max Karoubi, R. James Milgram, Daniel Quillen, Laurence Siebenmann, and C. T. C. Wall.

Special hour lectures were given by Gregory Brumfiel, William Jaco, Robion Kirby, Ronnie Lee, James Lin, Ib Madsen, John Morgan, Robert Oliver, Ted Petrie, P. Emery Thomas, F. Waldhausen, and James West.

There was also a series of problem sessions run by Raoul Bott (foliations), W. C. Hsiang (group actions and surgery), R. Kirby (3 and 4 manifolds), and C. T. C. Wall (algebraic K - and L -theory).

Among the more active seminars were 3 and 4 manifolds (Kirby), Kervaire invariant (Browder—E. Brown), Homotopy theory (E. Thomas—M. Mahowald), Algebraic K - and L - theory (J. Wagoner), Group actions (W. C. Hsiang), Foliations (Bott), Geometry of manifolds (L. Siebenmann), and Surgery and surgery classifying spaces (R. Lashof).

These proceedings include write ups of most of the main lectures, as well as selected seminar talks, and most of the problem sessions.

The institute was sponsored by the National Science Foundation under contract number MCS 76–01696.

The organizing committee wishes to thank Dorothy Smith of the American Mathematical Society for her help in running and organizing the conference.

R. JAMES MILGRAM
