## Preface

Harish-Chandra was a mathematician of great power, vision, and remarkable ingenuity. His profound contributions to the representation theory of Lie groups, harmonic analysis, and related areas of mathematics left a rich legacy for researchers that continues today. This volume contains the proceedings of an AMS Special Session entitled *Representation Theory and Noncommutative Harmonic Analysis: A Special Session Honoring the Memory of Harish-Chandra*. This session, held in Baltimore, Maryland, January 9-10, 1998, marked the seventy-fifth anniversary of Harish-Chandra's birth in 1923 and the fifteenth year after his untimely death in 1983 at the age of sixty.

The Table of Contents reveals contributions by an outstanding group of internationally known mathematicians. The papers range from expository and historical surveys to original research articles. The influence of Harish-Chandra's fundamental ideas form a backdrop throughout these papers. All of these articles, which span a rather broad range of mathematics, have been carefully refereed and will not appear elsewhere. Four Memorial Talks were given at Harish-Chandra's 1983 Memorial Service held at the Institute for Advanced Study by mathematicians who knew Harish-Chandra and his work well. These talks contain personal recollections of Harish-Chandra and were collected in a small memorial pamphlet by the Institute. They are published more widely here for the first time with the permission of the authors and the Institute. Two additional articles, *Some Recollections of Harish-Chandra* by Armand Borel, and *Harish-Chandra's  $c$ -Function: A Mathematical Jewel* by Sigurdur Helgason have been reprinted in this collection with permission of the authors and the publishers.

Most of the papers that appear herein are expanded versions of the authors' talks in Baltimore and were written especially for this volume. The lead-off paper, *Harish-Chandra, His Work, and its Legacy* by the second named co-editor, was also written especially for this volume at the request of the first named co-editor. The paper is based on his one hour opening address of the Special Session. The editors thank Rebecca Herb for her expository paper, *An Elementary Introduction to Harish-Chandra's Work*, which provides newcomers with a brief point of entry to some of Harish-Chandra's most basic mathematical ideas together with references to explore his work further.

The editors wish to express their sincere gratitude and thanks to all who made this volume possible. Special thanks go to the speakers for their beautiful talks and their willingness to spend many hours writing them up so that the results would be available to the larger mathematical community. We also acknowledge the hard work and help of the referees. We are indebted to Shirley Doran, our technical secretary, for a thoroughly professional job. Finally, we wish to thank Sergei Gelfand, Christine Thivierge, and the dedicated staff at the American Mathematical Society for their efforts in publishing these proceedings.

Robert S. Doran  
V. S. Varadarajan

## Selected Titles in This Series

*(Continued from the front of this publication)*

- 46 **Spencer J. Bloch, Editor**, Algebraic geometry – Bowdoin 1985 (Bowdoin College, Brunswick, Maine, July 1985)
- 45 **Felix E. Browder, Editor**, Nonlinear functional analysis and its applications (University of California, Berkeley, July 1983)
- 44 **William K. Allard and Frederick J. Almgren, Jr., Editors**, Geometric measure theory and the calculus of variations (Humboldt State University, Arcata, California, July/August 1984)
- 43 **François Trèves, Editor**, Pseudodifferential operators and applications (University of Notre Dame, Notre Dame, Indiana, April 1984)
- 42 **Anil Nerode and Richard A. Shore, Editors**, Recursion theory (Cornell University, Ithaca, New York, June/July 1982)
- 41 **Yum-Tong Siu, Editor**, Complex analysis of several variables (Madison, Wisconsin, April 1982)
- 40 **Peter Orlik, Editor**, Singularities (Humboldt State University, Arcata, California, July/August 1981)
- 39 **Felix E. Browder, Editor**, The mathematical heritage of Henri Poincaré (Indiana University, Bloomington, April 1980)
- 38 **Richard V. Kadison, Editor**, Operator algebras and applications (Queens University, Kingston, Ontario, July/August 1980)
- 37 **Bruce Cooperstein and Geoffrey Mason, Editors**, The Santa Cruz conference on finite groups (University of California, Santa Cruz, June/July 1979)
- 36 **Robert Osserman and Alan Weinstein, Editors**, Geometry of the Laplace operator (University of Hawaii, Honolulu, March 1979)
- 35 **Guido Weiss and Stephen Wainger, Editors**, Harmonic analysis in Euclidean spaces (Williams College, Williamstown, Massachusetts, July 1978)
- 34 **D. K. Ray-Chaudhuri, Editor**, Relations between combinatorics and other parts of mathematics (Ohio State University, Columbus, March 1978)
- 33 **A. Borel and W. Casselman, Editors**, Automorphic forms, representations and  $L$ -functions (Oregon State University, Corvallis, July/August 1977)
- 32 **R. James Milgram, Editor**, Algebraic and geometric topology (Stanford University, Stanford, California, August 1976)
- 31 **Joseph L. Doob, Editor**, Probability (University of Illinois at Urbana-Champaign, Urbana, March 1976)
- 30 **R. O. Wells, Jr., Editor**, Several complex variables (Williams College, Williamstown, Massachusetts, July/August 1975)
- 29 **Robin Hartshorne, Editor**, Algebraic geometry – Arcata 1974 (Humboldt State University, Arcata, California, July/August 1974)
- 28 **Felix E. Browder, Editor**, Mathematical developments arising from Hilbert problems (Northern Illinois University, DeKalb, May 1974)
- 27 **S. S. Chern and R. Osserman, Editors**, Differential geometry (Stanford University, Stanford, California, July/August 1973)
- 26 **Calvin C. Moore, Editor**, Harmonic analysis on homogeneous spaces (Williams College, Williamstown, Massachusetts, July/August 1972)
- 25 **Leon Henkin, John Addison, C. C. Chang, William Craig, Dana Scott, and Robert Vaught, Editors**, Proceedings of the Tarski symposium (University of California, Berkeley, June 1971)
