Preface

This collection consists of lectures delivered at the *First Siberian Winter School "Algebra and Analysis"* convened 9–17 March 1987 at a retreat not far from Kemerovo.

The school was organized by the Kemerovo State University and the Institute of Mathematics of the Siberian Branch of the Academy of Sciences of the USSR. More than 100 mathematicians from Novosibirsk, Kemerovo, Omsk, Moscow, Leningrad and other cities of the country participated.

The aim of the school was to organize a system of contacts between algebraists and specialists working in the area of mathematical analysis, in the broad sense of this word. The lectures acquainted the participants of the school with current research in algebra and areas in the boundary between algebra and analysis.
