TABLE OF CONTENTS

Introduction

Lecture 1: Some Notations and Definitions 2

2: Holomorphic Functions 6

3: Holomorphic Convexity and Domains of Holomorphy 11

4: Stein Manifolds 17

5: Subharmonic Functions 21

6: Subharmonic Functions (cont.) 26

7: Subharmonic Functions (cont.) 31

Plurisubharmonic Functions 34

8: Plurisubharmonic Functions (cont.) 37

9: Pseudoconvex Domains 42

10: Pseudoconvex Domains (cont.) 46

11: Pseudoconvex Domains (cont.) 50

12: Invariant Metrics 55

13: Biholomorphic Maps 60

14: Counterexamples to Smoothing of Plurisubharmonic Functions 66

15: Counterexamples to Smoothing of Plurisubharmonic Functions (cont.) 69

16: Counterexamples to Smoothing of Plurisubharmonic Functions (cont.) 73

17: Counterexamples to Smoothing of Plurisubharmonic Functions (cont.) 79

18: Complex Monge Ampére Equation 83

19: H^{∞}-Convexity 87

20: CR-Manifolds 91

21: CR-Manifolds (cont.) 95

22: CR-Manifolds (cont.) 100

Lecture 23: Pseudoconvex Domains without Pseudoconvex Exhaustion . . . 102

24: Stein Neighborhood Basis 105

25: Stein Neighborhood Basis (cont.) 109

26: Stein Neighborhood Basis (cont.) 113

27: Riemann Domains over $\mathbb{C}^n$ 115

28: The Kohn-Nirenberg Example 119

29: Peak Points 123

30: Bloom's Example 126

31: D'Angelo's Example 129

32: Integral Manifolds 133

33: Peak Sets for A(D) 138

34: Peak Sets. Step 1. 141

35: Peak Sets. Step 2. 145

36: Peak Sets. Step 3. 148

37: Peak Sets. Step 4. 159

38: Sup-Norm Estimates for the $\overline{\partial}$-Equation 165

39: Sibony's $\overline{\partial}$-Example 168

40: Hypoellipticity for $\overline{\partial}$ 174

41: Inner Functions 178

42: Inner Functions (cont.) 184

43: Large Maximum Modulus Sets 189

44: Zero Sets 194

45: Nontangential Boundary Limits of Functions in $H^\infty(\mathbb{B}^n)$ . . . 202

46: Wermer's Example 212

47: The Union Problem 214

48: Riemann Domains 218

49: Runge Exhaustion 222

Lecture 50: Runge Exhaustion (cont.) 227

51: Peak Sets in Weakly Pseudoconvex Boundaries 229

52: Peak Sets in Weakly Pseudoconvex Boundaries (cont.) . . . 234

53: The Kobayashi Metric 236

Bibliography 242
