Preface	vii
List of Participants	ix
On the infrared problem for the dressed non-relativistic electron in a magnetic field LAURENT AMOUR, JÉRÉMY FAUPIN, BENOÎT GRÉBERT, and JEAN-CLAUDE GUILLOT	1
Absence of singular spectrum for some time-periodic magnetic systems O. BOURGET and C. FERNÁNDEZ	25
Mourre estimates for a 2D magnetic quantum Hamiltonian on strip-like domains PHILIPPE BRIET, PETER D. HISLOP, GEORGI RAIKOV, and ERIC SOCCORSI	33
Perturbation of a magnetic Schrödinger operator near an embedded infinite-multiplicity eigenvalue VINCENT BRUNEAU, ABDALLAH KHOCHMAN, and GEORGI RAIKOV	47
Remarks on eigenvalue estimates and semigroup domination RUPERT L. FRANK	63
Delocalization for random Landau Hamiltonians with unbounded random variables FRANÇOIS GERMINET, ABEL KLEIN, and BENOIT MANDY	87
A linear criterion for solutions of non-linear equations, with application to the BCS gap equation CHRISTIAN HAINZL and ROBERT SEIRINGER	101
Semiclassical analysis of Schrödinger operators with magnetic wells BERNARD HELFFER and YURI A. KORDYUKOV	105
The magnetic formalism; new results VIOREL IFTIMIE, MARIUS MĂNTOIU, and RADU PURICE	123
Norm resolvent convergence to Schrödinger operators with infinitesimally thin toroidal magnetic fields AKIRA IWATSUKA, TAKUYA MINE, and SHIN-ICHI SHIMADA	139
Lifshitz tails for alloy type random models in constant magnetic fields: a short review FRÉDÉRIC KLOPP	153

New formulae for the Aharonov-Bohm wave operators SERGE RICHARD	159
On the spectral properties of the Landau Hamiltonian perturbed by a moderately decaying magnetic field GRIGORI ROZENBLUM and GRIGORY TASHCHIYAN	169
