

Contents

Preface	vii
Variational Problems Arising in Biology <i>Elena Alvarez-Buylla, Mariana Benítez, Álvaro Chaos, Yuriria Cortés, Gerardo Escalera-Santos, Carlos Espinosa, and Pablo Padilla</i>	1
On the Cauchy Problem for Phase and Vortices in the Parabolic Ginzburg–Landau Equation <i>Fabrice Béthuel, Giandomenico Orlandi, and Didier Smets</i>	11
Nonlocal Cahn–Hilliard and Isoperimetric Problems: Periodic Phase Separation Induced by Competing Long- and Short-Range Interactions <i>Rustum Choksi</i>	33
On a Generalized Ginzburg–Landau Energy for Superconducting/Normal Composite Materials <i>Tiziana Giorgi and Hala Jadallah</i>	47
Global Questions for Map Evolution Equations <i>Meijiao Guan, Stephen Gustafson, Kyungkeun Kang, and Tai-Peng Tsai</i>	61
Pohožaev-Type Identities for an Elliptic Equation <i>Radu Ignat</i>	75
Some Remarks on Monge–Ampère Functions <i>Robert L. Jerrard</i>	89
Variational Versus PDE-Based Approaches in Mathematical Image Processing <i>B. Kawohl</i>	113
On the Energy of a Chern–Simons–Higgs Vortex Lattice <i>Matthias Kurzke and Daniel Spirn</i>	127
Some Recent Results about a Class of Singularly Perturbed Elliptic Equations <i>Andrea Malchiodi</i>	153
The Dipole Problem for $H^{1/2}(\mathbb{S}^2; \mathbb{S}^1)$ -Maps and Application <i>Vincent Millot</i>	165
Hodge Decompositions, Γ -Convergence and the Gross–Pitaevskii Energy <i>Alberto Montero</i>	179
Bifurcation of Vortex Solutions to a Ginzburg–Landau Equation in an Annulus <i>Yoshihisa Morita</i>	187

An Allen–Cahn Type Problem with Curvature Modification <i>Xiaofeng Ren</i>	201
Rare Events, Action Minimization, and Sharp Interface Limits <i>Maria G. Westdickenberg</i>	217
The Gauss–Green Theorem for Weakly Differentiable Vector Fields <i>William P. Ziemer</i>	233
