

## CONTENTS

Foreword	vii
Preface	ix
Editors' introduction	xiii
<b>Section I: Model Infrastructure</b>	
The implications of spatial structure within populations to the evolution of parasites <i>Mike Boots, Masashi Kamo, and Akira Sasaki</i>	3
Insights from Price's equation into evolutionary epidemiology <i>Troy Day and Sylvain Gandon</i>	23
Within-host pathogen dynamics: Some ecological and evolutionary consequences of transients, dispersal mode, and within-host spatial heterogeneity <i>Robert D. Holt and Michael Barfield</i>	45
Evolutionary and dynamic models of infection with internal host structure <i>John K. Kelly</i>	67
Basic methods for modeling the invasion and spread of contagious diseases <i>Wayne M. Getz and James O. Lloyd-Smith</i>	87
<b>Section II: Applications to Specific Diseases</b>	
Modeling the invasion and spread of contagious diseases in heterogeneous populations <i>Wayne M. Getz, James O. Lloyd-Smith, Paul C. Cross, Shirli Bar-David, Philip L. Johnson, Travis C. Porco, and María S. Sánchez</i>	113
A cophylogenetic perspective on host-pathogen evolution <i>Michael A. Charleston and Alison P. Galvani</i>	145
The influence of anti-viral drug therapy on the evolution of HIV-1 pathogens <i>Zhilan Feng and Libin Rong</i>	161
Do rhinoviruses follow the neutral theory? The role of cross-immunity in maintaining the diversity of the common cold <i>William J. Koppelman and Frederick R. Adler</i>	181
Drug resistance in acute viral infections: Rhinovirus as a case study <i>Alun L. Lloyd and Dominik Wodarz</i>	193
Dynamics and control of antibiotic resistance in structured metapopulations <i>David L. Smith, Maciej F. Boni, and Ramanan Laxminarayan</i>	213
