List of Tables	xi
List of Figures	xiii
Preface	xv
0.1. The first part: Chapters 1-3	xv
0.2. The second part: Chapters 4-8	xv
0.3. Future work	xvi
0.4. Acknowledgements	xvi
0.5. Notation	xvi
Chapter 1. Coxeter Groups	1
1.1. Regular cell complexes and simplicial complexes	1
1.1.1. Gate property	1
1.1.2. Link and join	2
1.2. Hyperplane arrangements	2
1.2.1. Faces	2
1.2.2. Flats	3
1.2.3. Spherical picture	4
1.2.4. Gate property and other facts	4
1.3. Reflection arrangements	4
1.3.1. Finite reflection groups	5
1.3.2. Types of faces	5
1.3.3. The Coxeter diagram	5
1.3.4. The distance map	6
1.3.5. The Bruhat order	6
1.3.6. The descent algebra: A geometric approach	7
1.3.7. Link and join	7
1.4. The Coxeter group of type A_{n-1}	8
1.4.1. The braid arrangement	8
1.4.2. Types of faces	9
1.4.3. Set compositions and partitions	9
1.4.4. The Bruhat order	10
Chapter 2. Left Regular Bands	13
2.1. Why LRBs?	13
2.2. Faces and flats	14
2.2.1. Faces	14
2.2.2. Flats	14

2.2.3.	Chambers	14
2.2.4.	Examples	15
2.3.	Pointed faces and lunes	15
2.3.1.	Pointed faces	15
2.3.2.	Lunes	15
2.3.3.	The relation of Q and Z with Σ and L	16
2.3.4.	Lunar regions	16
2.3.5.	Examples	17
2.4.	Link and join of LRBs	19
2.4.1.	SubLRB and quotient LRB	19
2.4.2.	Product of LRBs	19
2.5.	Bilinear forms related to an LRB	19
2.5.1.	The bilinear form on $\mathbb{K}Q$	20
2.5.2.	The pairing between $\mathbb{K}Q$ and $\mathbb{K}\Sigma$	21
2.5.3.	The bilinear form on $\mathbb{K}\Sigma$	21
2.5.4.	The bilinear form on $\mathbb{K}L$	22
2.5.5.	The nondegeneracy of the form on $\mathbb{K}L$	22
2.6.	Bilinear forms related to a Coxeter group	24
2.6.1.	The bilinear form on $(\mathbb{K}\Sigma)^W$	24
2.6.2.	The bilinear form on $(\mathbb{K}L)^W$ and its nondegeneracy	25
2.7.	Projection posets	26
2.7.1.	Definition and examples	26
2.7.2.	Elementary facts	27
Chapter 3.	Hopf Algebras	31
3.1.	Hopf algebras	31
3.1.1.	Cofree graded coalgebras	31
3.1.2.	The coradical filtration	32
3.1.3.	Antipode	32
3.2.	Hopf algebras: Examples	33
3.2.1.	The Hopf algebra Λ	33
3.2.2.	The Hopf algebra $Q\Lambda$	35
3.2.3.	The Hopf algebra $N\Lambda$	36
3.2.4.	The duality between $Q\Lambda$ and $N\Lambda$	37
Chapter 4.	A Brief Overview	39
4.1.	Abstract: Chapter 5	39
4.2.	Abstract: Chapter 6	40
4.3.	Abstract: Chapters 7 and 8	41
Chapter 5.	The Descent Theory for Coxeter Groups	43
5.1.	Introduction	43
5.1.1.	The first part: Sections 5.2-5.5	43
5.1.2.	The second part: Sections 5.6-5.7	44
5.2.	The descent theory for Coxeter groups	45
5.2.1.	Preliminaries	45
5.2.2.	Summary	45
5.2.3.	The posets Z and \bar{L}	46
5.2.4.	The partial orders on $\mathcal{C} \times \mathcal{C}$ and Q	46
5.2.5.	The map Road	48

5.2.6.	The map GRoad	49
5.2.7.	The map Θ	50
5.2.8.	Connection among the three maps	51
5.3.	The coinvariant descent theory for Coxeter groups	52
5.3.1.	The map des	52
5.3.2.	The map gdes	53
5.3.3.	The map θ	53
5.3.4.	Connection among the three maps	54
5.3.5.	Shuffles	55
5.3.6.	Sets related to the product in the M basis of SA	57
5.4.	The example of type A_{n-1}	58
5.4.1.	The posets Σ^n and L^n	59
5.4.2.	The posets Q^n and Z^n	59
5.4.3.	The quotient posets \overline{Q}^n and \overline{L}^n	60
5.4.4.	The maps Road, GRoad and Θ	60
5.4.5.	The maps des, gdes and θ	61
5.4.6.	Shuffles	62
5.5.	The toy example of type $A_1^{\times(n-1)}$	62
5.5.1.	The posets Σ^n and L^n	62
5.5.2.	The posets Q^n and Z^n	63
5.5.3.	The quotient posets \overline{Q}^n and \overline{L}^n	63
5.5.4.	The maps Des, GDes and Θ	64
5.5.5.	The maps des, gdes and θ	64
5.6.	The commutative diagram (5.8)	64
5.6.1.	The objects in diagram (5.8)	65
5.6.2.	The maps s , Θ and Road	66
5.6.3.	The bilinear form on $\mathbb{K}Q$	67
5.6.4.	The top half of diagram (5.8)	68
5.6.5.	The maps supp, lune and base*	68
5.6.6.	The dual maps supp*, lune* and base	69
5.6.7.	The maps Φ and Υ	69
5.6.8.	The bottom half of diagram (5.8)	69
5.6.9.	The algebra $\mathbb{K}L$	70
5.7.	The coinvariant commutative diagram (5.17)	71
5.7.1.	The objects in diagram (5.17)	72
5.7.2.	The maps from invariants	73
5.7.3.	The maps to coinvariants	75
5.7.4.	The maps in diagram (5.17)	76
5.7.5.	The algebra $\mathbb{K}\overline{L}$	77
5.7.6.	A different viewpoint relating diagrams (5.8) and (5.17)	78
Chapter 6.	The Construction of Hopf Algebras	81
6.1.	Introduction	81
6.1.1.	A diagram of vector spaces for an LRB	81
6.1.2.	A diagram of coalgebras and algebras for a family of LRBs	82
6.1.3.	The example of type A	83
6.2.	The Hopf algebras of type A	85
6.2.1.	Summary	85
6.2.2.	The structure of the Hopf algebras of type A	86

6.2.3.	Set compositions	86
6.2.4.	The Hopf algebra Π	88
6.2.5.	The Hopf algebra $\text{M}\Pi$	89
6.2.6.	Nested set compositions	89
6.2.7.	The Hopf algebra $\text{Q}\Pi$	90
6.2.8.	The Hopf algebra $\text{N}\Pi$	91
6.2.9.	Set partitions	91
6.2.10.	The Hopf algebra Π_{L^*}	91
6.2.11.	The Hopf algebra Π_L	92
6.2.12.	Nested set partitions	92
6.2.13.	The Hopf algebra Π_{Z^*}	93
6.2.14.	The Hopf algebra Π_Z	93
6.2.15.	The Hopf algebra $\text{S}\Pi$	93
6.2.16.	The Hopf algebra $\text{R}\Pi$	94
6.3.	The coalgebra axioms and examples	94
6.3.1.	The coalgebra axioms	94
6.3.2.	The warm-up example of compositions	96
6.3.3.	The motivating example of type A_{n-1}	97
6.3.4.	The example of type $A_1^{\times(n-1)}$	101
6.4.	From coalgebra axioms to coalgebras	102
6.4.1.	The coproducts	102
6.4.2.	Coassociativity of the coproducts	103
6.4.3.	Useful results for coassociativity	103
6.5.	Construction of coalgebras	105
6.5.1.	Examples	105
6.5.2.	The coproducts and local and global vertices	106
6.5.3.	The coalgebra \mathcal{P}	106
6.5.4.	The coalgebra \mathcal{M}	108
6.5.5.	The coalgebra \mathcal{Q}	110
6.5.6.	The coalgebra \mathcal{N}	111
6.5.7.	The coalgebra \mathcal{S}	112
6.5.8.	The coalgebra \mathcal{R}	114
6.5.9.	The maps $\text{Road} : \mathcal{S} \rightarrow \mathcal{Q}$ and $\Theta : \mathcal{N} \rightarrow \mathcal{R}$	114
6.5.10.	The coalgebras $A_{\mathcal{Z}}, A_{\mathcal{L}}, A_{\mathcal{Z}^*}$ and $A_{\mathcal{L}^*}$	115
6.6.	The algebra axioms and examples	117
6.6.1.	The algebra axioms	117
6.6.2.	The warm-up example of compositions	119
6.6.3.	The motivating example of type A_{n-1}	120
6.6.4.	The example of type $A_1^{\times(n-1)}$	121
6.7.	From algebra axioms to algebras	122
6.7.1.	The products	122
6.7.2.	Associativity of the products	122
6.7.3.	Useful results for associativity	123
6.8.	Construction of algebras	123
6.8.1.	Examples	124
6.8.2.	The algebra \mathcal{P}	124
6.8.3.	The algebra \mathcal{M}	126
6.8.4.	The algebra \mathcal{Q}	127

6.8.5.	The algebra \mathcal{N}	128
6.8.6.	The algebra \mathcal{S}	128
6.8.7.	The algebra \mathcal{R}	129
6.8.8.	The maps $\text{Road} : \mathcal{S} \rightarrow \mathcal{Q}$ and $\Theta : \mathcal{N} \rightarrow \mathcal{R}$	130
6.8.9.	The algebras $A_{\mathcal{Z}}, A_{\mathcal{L}}, A_{\mathcal{Z}^*}$ and $A_{\mathcal{L}^*}$	131
Chapter 7. The Hopf Algebra of Pairs of Permutations		133
7.1.	Introduction	133
7.1.1.	The basic setup	133
7.1.2.	The main result	133
7.1.3.	The Hopf algebras RII and RA	134
7.1.4.	Three partial orders on $\mathcal{C}^n \times \mathcal{C}^n$	135
7.1.5.	The different bases of SII and SA	135
7.1.6.	The proof method and the organization of the chapter	136
7.2.	The Hopf algebra SII	137
7.2.1.	Preliminary definitions	137
7.2.2.	Combinatorial definition	138
7.2.3.	The break and join operations	138
7.2.4.	Geometric definition	139
7.2.5.	The Hopf algebra SA	139
7.3.	The Hopf algebra SII in the M basis	141
7.3.1.	A preliminary result	141
7.3.2.	Coproduct in the M basis	141
7.3.3.	Product in the M basis	143
7.3.4.	The switch map on the M basis	145
7.4.	The Hopf algebra SII in the S basis	145
7.4.1.	Two preliminary results	146
7.4.2.	Coproduct in the S basis	147
7.4.3.	Product in the S basis	150
7.5.	The Hopf algebra RII in the H basis	150
7.5.1.	Coproduct in the H basis	151
7.5.2.	Product in the H basis	152
7.5.3.	The switch map on the H basis	153
Chapter 8. The Hopf Algebra of Pointed Faces		155
8.1.	Introduction	155
8.1.1.	The basic setup	155
8.1.2.	Cofreeness	155
8.1.3.	Three partial orders on \mathcal{Q}^n	156
8.1.4.	The different bases of QII	156
8.1.5.	The connection between SII and QII	157
8.2.	The Hopf algebra QII	157
8.2.1.	Geometric definition	157
8.2.2.	Combinatorial definition	159
8.3.	The Hopf algebra PII	161
8.4.	The Hopf algebra QA of quasi-symmetric functions	162
